Dementia in its various forms remains a high public health priority in the UK, having significant impact not just on the patients but also their family members, friends and carers. NHS staff today therefore need to be aware of the many complex factors that are involved in the diagnosis and care of those affected. We have provided a list of recent and relevant articles from MA Healthcare journals dealing with this area, thereby providing your NHS staff with research, information and tips that will support both their work and their patients.

**British Journal of Community Nursing**
